PETITION FOR URGENT LEGISLATION RE THE IMPORTATION OF PALM OIL BIOFUEL

To the Honourable Prime Minister and the Honourable Minister for Resources and Energy:

We the undersigned have been made aware by the Palm Oil Action Group that Australia is importing millions of litres of Palm Oil biodiesel fuel, and, on top of this, is effectively subsidising its use.

There is currently no requirement for Australian biodiesel to be derived from sustainable sources and it is incomprehensible to us that Australia uses a so called 'green fuel' in her country whilst directly increasing carbon emissions and habitat loss in another.

We call upon the Australian Government to join others in the world arena and legislate that imported biodiesel **must not be complicit in forest destruction**, and to stimulate our local economy by providing truly green alternatives.
